

NEW Colour-Spec Lintel

For any number of reasons concrete surfaces can exhibit a variety of colour shadings, which may not always be acceptable in the finished appearance of the building it serves. To even out tones and give consistent colour and quality of appearance, the Lintels Division of Naylor Concrete Products now offer a colour wash service for all lintels in the Hi-Spec range.

One such project involved the conversion and extension of an existing barn to provide luxury accommodation. Although specified as cast stone heads to the external elevations, the client and developer opted for our reference R6 (100 x 145) and R9 (100 x 215) which were colour matched to the sample provided.

The benefits of Colour-Spec Lintels are:

Equalises variations in colour and texture * Extensive colour range * Colours can be tailored for individual customer requirements * Reduces surface dusting Increase light reflectivity * Provides proven longlife decorative and protective integral finish
