Core Tube, Cutting Sleeves & Packaging

Standard & Bespoke Solutions for Core Tubes, Latts, Packaging/Carrying & Protection Tubes

Polypropylene and HDPE Core Tubes

A full range of material and size specific core tubes can be manufactured to suit your finished product, application and the processing machinery. Cores are made to specific critical criteria such as ID, OD, wall thickness, processing methods, surface finish and length.

Typical ID/Wall Thickness

38.5mm x 3.5 to 6.5mm wall
76.7mm x 4.0 to 7.6mm wall

Minimum Order Quantities may apply

ABS and PVC Core Tubes

A full range of larger size specific core tubes can be manufactured to suit your exact requirements. The majority of these larger cores are used within the processing system and last longer than card cores as well as being able to be used in wet, moist and hostile conditions.

Typical ID/Wall Thickness

152mm x 5.5 to 7.5mm wall
165mm x 6.0 to 7.6mm wall
86mm x 2.0 to 2.75mm wall

Minimum Order Quantities may apply

Packaging/Carrying Protection Core Tubes

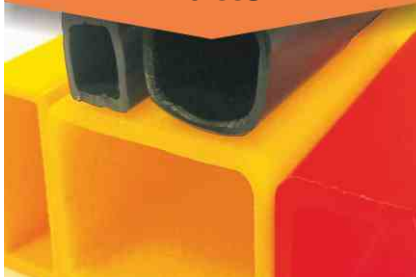

Many packaging applications suit bespoke tubes. Support tubes help increase carton & display bins strength & life span. A variety of sizes can be used for storage of rigid, flexible lengths of finished product. Caps or plugs can be supplied to enable them to carry & protect products such as weld, fishing & drain rods etc as well as drawings, posters and documents. Our extensive range of tooling allows many sizes from 3mm to 315mm

Minimum Order Quantities may apply

Cutting Sleeves

Looking for a reusable cost effective alternative for a cutting sleeve to protect your materials? Have you considered the Naylor Specialist Plastic option? Source your core tubes and cutting sleeves from one UK manufacturer.

Packaging Latts

Plastic packaging latts can be used especially when products are being manufactured for the food industry where a hygienic environment is required. Typically used as packaging within the bag, film and wrap industries, manufacturers have found they meet all criteria required
